Summary

Motivated Full-Stack Web Developer and team player. Constantly challenging myself to research new languages and technologies while refining my current skill set. Exceptional time management and ability to quickly prioritize. Excited to join a team to apply my skills and grow alongside industry professionals.

Technical Skills

Languages: HTML5, CSS3, JavaScript/ES6, jQuery

Technologies: Node.js, Express.js, Git Source Control, Bootstrap, Firebase, API integration, React.js, MongoDB, MySQL, JSON Web Token, Node Package Manager

Scout:

Ride-share comparison app - Scout utilizes a clear and simple user interface to show real-time prices and ETAs of the leading ride-share services allowing the user to find the cheapest or fastest service.

My Role: Project Leader and Github Source Control Manager. Integrated the Google Maps API and led overall UI/UX site design. Led presentation for the final grade of the project.

Languages/Tech Used: HTML, CSS, Bootstrap, JavaScript, jQuery, APIs (Google Maps, Uber, Lyft), Express.js
